Chairman's Foreword

Foundation for Academic Excellence and Access (FAEA) has created a vibrant movement in favour of the disadvantaged, the most marginalized sections of the society through its unique innovative practice – multi-pronged, flexible, context-sensitive, capacity building inclusive approach. It has contributed responsibly to higher education practices by offering a ***blue print that moves beyond quotas and piece-meal approaches towards a more equitable, people-centered practice***. Innovations need sustenance. It is heartening to note that with Tata and CII as well as some individuals has come forward in a major way to support our program. It is my hope that more and more organizations will come forward to invest in human potential from these socially and economically disadvantaged students. FAEA believes the tangible outcomes through corporate partnership is expected to pave way for greater participation in higher education, which nurtures young, future leaders as the potential shapers of India's destiny.

A.P. Chattopadhyay

Empowering with Excellence - A Transformatory Initiative

An important engagement of higher education policy in India has been its relentless effort to address the challenges of securing equity and social justice. **Despite Central and State Governments' massive initiatives,** students from disadvantaged socio-economic and geographical backgrounds are yet to receive **quality higher education. The Foundation for Academic Excellence and Access (FAEA) was set up in the summer of 2002 at New Delhi with an aim to enable**

members of the economically and socially disadvantaged groups, access to institutions, which give access to academic excellence, structures of power and economic opportunities. The Foundation emphasizes on the equality of opportunity to assist students what they want to become so that they have a choice and are not dictated by necessity. The Foundation is committed to the idea of education devoted to founding of a just, productive and cultured society.

FAEA scholars seen with Dr. APJ Abdul Kalam

Translating its mission of *empowerment with excellence*, FAEA's path-breaking strategy is a unique blend of providing scholarships to the meritorious disadvantaged students and supplementary support through skills development programs. The Foundation's initial endeavour to realize the lofty goals and vision of social justice and empowerment of the marginalized began with a generous support grant from the Ford Foundation. The Ford Foundation grant helped provide scholarships, mentorship and skill development support to over 800 students directly and indirectly to thousands of students in various colleges of India, of whom most were sons and daughters of marginalized income earners like agricultural labourers, rickshaw pullers etc. Besides, FAEA partnered with 22 of the finest colleges of India during 2002-2007 and provided them support that helped build the capacities of students through skill development programmes and also re-oriented the institutions towards a greater commitment to the cause of the disadvantaged. As an unprecedented

Late Shri K.R. Narayanan with Dr. Abid Hussain, former Member, Constitution Commission of India and Indian Ambassador to United States of America

initiative in India, the Foundation plays a unique transformative role in the lives of students as well as institutions.

In Search of Talent

The Foundation identifies the poorest of the poor using the *FAEA Deprivation Index*. The Scholarship gives them the support required for enhancing their confidence and dignity. Monetary support as a precursor to true empowerment is evident with students facing the constraints of financial resources, which deterred their choice of college but FAEA Scholarship opened up newer realms of hope and poise. The Foundation has made it possible for their dreams to come true. Most remarkably, the Scholarships have inspired students to move beyond the given. There are instances when grant recipients have excelled in extra-curricular activities; some have chosen to share their scholarship with others. The scholarship has enhanced their confidence to stand up with dignity and harness hope for the future. Enhancement of self-worth is a significant indicator of empowerment and FAEA takes pride in having initiated this process.

Re-orienting Institutions

The Pathways Program component of the Ford Foundation grant provided a context for FAEA to collaborate with 22 colleges of India (2002- 2007) for implementing inclusivity at its institutions. The colleges opened up dedicated support services for the students that focused on imbuing life skills, language and IT skills amongst its students as essential means of empowerment. For the first time in India, skill building modules aimed at facilitating the personal, social and career development of

students who entered the portals of higher education institutions. A spectrum of workshops, fieldtrips, training programs, encouraged students' participation, as these initiatives went beyond the confines of the syllabus and cloistered classrooms. Embedding such programs in higher education institutions strengthened commitment of these institutions in educating the marginalized; increased their sensitivity; and helped address the needs of the disadvantaged in a more concrete manner. FAEA feels satisfied that inspired by the impact of the program, most colleges are continuing the activities started with the support of FAEA.

From Poverty to Puissant professionalism

Placements complete the cycle towards the empowerment of less privileged learners. Placements for this section of students went beyond mere job procurement to include career guidance for higher education, preparation for competitive examination and training for self-employment and entrepreneurship. All participating colleges were given a special grant to establish Placement Cells. It is inspiring to note that many students who participated in the FAEA program have been placed in good jobs and some have gone ahead to pursue their master's degree.

Thus, FAEA's unique turnkey strategy for bridging the gaps between poverty and pursuit of excellence has been - first a country-wide *search* of the most talented youth among the poorest of the poor, then to *place* them in select institutions, *mentor* the academics, *hone* their social skills, closely *monitor* their progress with feedback and in time, to help them gain useful employment.

"FAEA have relieved my stress & initiated focal developmental behavior towards social responsibility in me through various workshops."

Devarasu. M

1. Achievements

The Foundation for Academic Excellence and Access **was set up to** achieve these goals in mind:

1. Emphasis on empowerment through excellence,
2. Emphasis on equality of opportunities,
3. Students need to have a choice and are not affected by social and economic necessity,
4. Reduce the drop-out rate of the students,
5. Enable students to study in institutions of excellence,
6. Provide equitable and accessible opportunities,
7. Mentor the students and offer them skills required for their personal, social and career development,
8. Enable students to use modern technologies,
9. To foster the commitment of institutions toward education of the marginalized,
10. Promote networking among the institutions,
11. Address the educational deprivation faced by the disadvantaged groups,
12. Analyze the needs of the disadvantaged groups to identify special programs,
13. Create an information base of all students regarding their background, progress, performance etc.,
14. Follow up of students and creation of an alumni association,
15. Evaluation and monitoring.

All the above have been achieved but in varied degrees and the challenges continue.

has helped them move out of their deprivations and scarcity. They have been provided opportunities for skill development and most of them have found themselves well placed and many are pursuing higher education.

1. The recipients of Scholarships have been given access to courses of their choice. Thus the grant

2. From 2002 - 2006 FAEA brought under its umbrella 22 institutions and these committed themselves through the grant to the cause of social justice and chartered pathways to reach the set goals. FAEA helped create network among these institutions and in the yearly meets and through their contacts shared experiences at their own institutions and learnt from each other. Most importantly colleges within closer vicinity shared their facilities. It will be relevant to mention here that colleges hosted regional level and national level workshops and training programmes that brought together students from the partner colleges of different states. This experience has enabled FAEA to devise appropriate strategies in individual cases.

3. Educational deprivation faced by the students was adequately addressed. Remedial teaching programmes, preparation for competitive examinations, IT skills training, English language development and soft skills were provided to the students.

4. While the number of students in the Scheduled caste/tribe categories is specified by the Government of India policy, several institutions have changed their admission policy to include more students from the disadvantaged sections and made an active search for such students.

5. FAEA has created a structured database of Pathways students who found a clearer articulation following the evaluation study.

Some of the Indicators of Success are:

- Access to institutions of excellence as a precursor to access to economic opportunities,
- Enhanced academic performance of students,
- Access to equitable opportunities,
- Augmented confidence among the students,
- Increasing the sensitivity of institutions towards the needs of the marginalized,
- Ability of students to access information through technologies,
- Ability to communicate effectively,
- Enabling students to find suitable placements,
- Acceptance of the program as a pioneering work in the field to be replicated elsewhere, and
- Follow up of students and creation of alumni association.

“My heart swelled, when I saw the list of students that we have been able to support through our scholarships. The list is littered with tales of struggle and survival which should have the movie moguls scrambling for their stories”

– **Shri. Jamshed J. Irani, Chairman, Council on Affirmative Action, CII**
(Economic Times, 14th April 2008)

*“Education means brightness, without it one is in darkness. Thank you !
FAEA for making my life brighter”*

Ahir Prakash Kumar

“Being a son of daily worker and from a small village it was a nightmare for me to complete my education. But today it is a dream come true for me to be here at IIT, Bombay just because of generous support of FAEA”

Jitendra Franciss Sadangi

2. CII and Tata Project - Journey so far

FAEA's goal of providing scholarship was reinforced through the magnanimous support of the Confederation of Indian Industries (CII) and the Tata Group of Companies in the form of scholarships. Two hundred four scholars were selected using the FAEA deprivation index. This process was through the National Selection for identifying the poorest of the poor. These scholars hailed from across India and have graduated in streams such as BTech, BE, MBBS, BSc, BCA etc. Payment of scholarship has been circumstance based. The scholarship amount varied from student to student.

The programme took into account that most students irrespective of their liking and aptitude limited themselves to professional courses. So the programme encourages socially and educationally disadvantaged students to enroll in Arts, Humanities, Social and Political Science courses as well. Moreover the Scholarships were not limited to tuition fees, books and accommodation; it also included pocket money for scholars to lead a middle class life so that they develop the

confidence to compete with relatively affluent students. Some of these students are children of agricultural labourers and coolies, porters, tea stall owners and so on. In the course of the interviews many students appeared who were themselves working as coolies or agricultural labourers. Thus, the targeted Scholarships have helped initiate a countrywide search for talented youth among the poorest of the poor; place them in selected member institutions, facilitate supplementary academic coaching and development of social skills and help them land in jobs commensurate with their qualifications.

It has inspired colleges to devise their own scholarship schemes. It is also heartening to know that some of the scholars are sharing their salaries with FAEA as a gesture of help and sponsor other

College Principals from across India and eminent guests participated in workshop on 'Implementing Inclusivity- A National Consultation' in New Delhi.

"FAEA Programme will make an enduring and vital contribution towards empowering the weak and the marginalized communities", wrote The Review Committee.

Prof. Yogendra Singh, Professor, Emeritus, Jawaharlal Nehru University
Prof. Bharti Ray, Former Pro Vice Chancellor, Calcutta University
Dr. P. Radhakrishnan, Professor, Madras Institute of Development Studies
Prof. Kancha Ilaiah, Dept. of Sociology, Osmania University

promising disadvantaged learners and, further, are willing to work for resource mobilization with FAEA.

The Scholarships have ignited hopes and inspired students to move beyond the given. The Scholarship has brought a beacon of hope to all of them. An important observation that emerges is that the FAEA scholars performed brilliantly academically and many of them also went beyond the confines of academics by excelling in dance, music, etc. Their achievements are a living proof that the highest aspirations of young minds could be translated into action, given the required empowerment. Several of the scholars have kept abreast of the state-of-art in their own disciplines by participating in state and national level seminars and conferences. Almost all of them see the scholarship as a major responsibility on them and

want to give back to the society in the same way. Many of them are currently meaningfully contributing to the society in several ways. The scholarships have given many of them the confidence to come forward to participate enthusiastically in their college events. This is a major achievement for FAEA in initiating an empowerment process that truly enhances the self-worth of an individual. That is, the scholarship has helped them to move away from a point of disadvantage and to rather see themselves as privileged. **Thus, FAEA by acting as a catalyst of change has altered the futures of several deserving youth.** (For details please refer to the section 'From Poverty to Puissant Professionalism'.)

Most of the students have graduated and will be in the jobs immediately or pursue their masters.

"FAEA scholarship is a boon. The support given is wonderful. I am very glad to get this scholarship",

Ravi Chandra Vikas

"The financial aid from an organization that leads a hopeless student to conquer his/her unbelievable dreams comes true, it is nonetheless FAEA",

Anumala Anil

3. CII Selections 2011

As desired by CII, selections for 2011-12 were done on regional basis and once again FAEA takes pride that highly talented students who belonged to the poorest, marginalized and disadvantaged groups. The scholars were selected through a national selection process using the FAEA Assessment manual. About 23 states of India have been covered; although there are significant variations in the distribution of scholars.

Selection Process

This is a three-pronged strategy offering scholarship to students on the basis of (a) national selection and (b) through associate colleges and (c) special selections. During the first round advertisements are released in the major dailies by FAEA inviting application from students belonging to socially and economically marginalized sections of society. Principals from Navodaya Vidyalayas, Central School as well as some eminent personalities are also contacted to send in their recommendations. Application forms are received and processed as per the Assessment Manual and students are awarded FAEA points on the objective information provided by the applicants. Thereafter a set of general questions are sent to the short listed candidates to test their awareness and capacity for logical thinking and they are asked to appear for the interview. The

selection committee consists of very eminent persons. This year we had eminent persons like Dr. Abid Hussain, Former Member Constitution Commission of India and Indian Ambassador to United States of America, Prof. V. R. Mehta, Former Vice-Chancellor, University of Delhi, Prof. Armaity Desai, Former Chairperson University Grants Commission, Smt. Mohini Giri, Former Chairperson National Commission for Women, Dr. K.K. Panda, Former Registrar, University of Delhi, Dr. P. K. Dan, Prof. Anirban Kundu, Professor Physics, University of Calcutta, Mr. Asim Kumar Basu. From CII we had Mr. Farhad Forbes, Director Forbes Marshall, Ms. Seema Mathew. Mr. Avinash Mattoo and Ms. Supriya Choudhury. The purpose of the interview is first, to identify students with talent and secondly, to investigate the economic status of those students on the basis of the information supplied by them.

Most of the students selected on the national basis have opted for technical and professional courses. In order to encourage students from liberal arts and sciences, FAEA decided to ask the principals of the associate colleges selected to recommend a panel of names of outstanding and needy students from their respective institutions on the basis of a transparent process of selection within the college. The details of these students were to be sent with justificatory notes. FAEA then chose the top three students from each college.

“Your attempt to locate those who are underprivileged and meritorious was unquestionably successful. The students who came truly belonged to the deprived sections of our country. I was amazed to discover so much brain among those who are struggling just to survive.”

– Bharti Ray, Former Pro Vice Chancellor, University of Calcutta

Scholarships under special selection are given to needy and academically bright students. Upon the recommendation of the committee, FAEA considers students for scholarship if they deserve and belong to prestigious institutions like Indian Institute of Technology or belong to very backward states.

We have made the payment of scholarship circumstance based. The scholarship amount varies from student to student. Moreover we also support special courses, provided the Principal/Head of institution feels that attending these courses will add value to the candidate's education.

Family income distribution

While quotas provide mere access, it is the bursaries that provide them and sustain them with quality education. It is time the Indian higher education realized that there is much left to be desired in the quota system and seek for ways and means of awarding bursaries to the meritorious needy students. It is here that interventions from industry play a crucial role in augmenting the current scenario of quality access to higher education.

FAEA has made earnest efforts to scout for the poorest of the poor. Using the FAEA Assessment manual, which accurately identifies the poorest of the poor, scholars were identified. It is evident from the graph that majority of the scholars selected so far fall under the income bracket of Rs. 20000-30000 per annum and Rs. 10000-20000 per annum. Unless the poorest of the poor is taken care of in India, our democratic setup cannot be said to have progressed. The underlying motto of FAEA has been *to provide the poorest of the poor with the richest of education*. These Scholarships have certainly opened up newer pathways for these needy meritorious students. It will not be an exaggeration to say that the Scholarship has altered their futures.

Gender Distribution of CII Scholars

65% of the students selected were males and only 35% females. FAEA shall try to bridge the gap next year while filling up the vacancies.

State wise distribution of CII scholars 2011-12

Out of the total scholars selected so far 39% are first generation learners, 26% whose siblings completed matriculation first and 39% whose parents completed matriculation first.

Distribution on basis of Family Occupation

Majority of the scholars selected are sons and daughters of farmers (46%) and laborers (18%). The rest are engaged as coolies, semi skilled or skilled workers.

Academic Diversity

The Scholarships have imbued hopes and inspired students. Their achievements are a living proof that the highest aspirations of young minds could be translated into action, given the required empowering support. The Scholarships have helped them overcome their day to day struggles and the thought subsistence being a deterrent to their further education is partially resolved.

FAEA is happy that it has supported them in the journey of their ascent to planes of excellence

Most students are sons and daughters of illiterate parents. It is evident that these students have come a long way in their lives despite absence of adequate support. Nearly a quarter of the Scholarship holders are first generation learners. The Scholarship has indeed made them break some of the barriers in their lives and their current experience of the Scholarship reveals that given equitable opportunities, students from the marginalized sections, can be brought at par with the remaining sections of the society.

4. Our Scholars

- **Gundugallu Peddanna**

Andhra Pradesh

J.N.T.U. College Of Engineering - B.Tech. (FINISHED)

He is a first generation learner and son of a coolie with an annual income of Rs. 9000/- p.a. He could not even manage his fees and was helped by his teachers. He secured 93.7 % in higher secondary.

- **Jyothi Bai S**

Karnataka

Bangalore Medical College - M. B. B. S. (FINISHED)

She is daughter to an illiterate mother. Her father studied till primary and is into agriculture. Total annual income to support the family is Rs. 8900/-. She secured 91.5 % in higher secondary.

- **Patteppagari Panduranga**

Andhra Pradesh

Jawaharlal Nehru Technology University - B. Tech. (FINISHED)

He is a first generation learner. His father is an agriculture labourer earning Rs. 9000/- p.a.

- **Vahini Badavathu**

Andhra Pradesh

Maharajas Institute Of Medical Science - M. B. B. S. (FINISHED)

She is also daughter to illiterate parents. Their total family income is Rs. 20000/- p.a. She passed her higher secondary with 93.7 %.

- **B. Bhuvanewari**

Tamil Nadu

M.N.S.K. College Of Engineering - B. E. (FINISHED)

Daughter of a coolie earning just Rs. 24000/- p.a. Her higher secondary score was 80.5%

- **R. Bhasker**

Andhra Pradesh

Sree Nidhi Institute Of Science & Technology - B. Tech. (FINISHED)

He is a son of illiterate agriculturer. His mother is a house wife and family income is Rs. 15000/- p.a. He secured 94.4 % in class XII.

- **Sriraj Karthick**

Tamil Nadu

Thiyagarajar College of Engineering - B. E. (FINISHED)

His father is no more and mother studied till primary. His mother is a coolie earning Rs. 11280/- p.a. His class XII percentage was 87.3

- **Madduru Ramu**

Andhra Pradesh

Sri Krishna Rao Dev University - B.Tech. (Placement)

Son of illiterate parents managed to score 93.2 % in his higher secondary with his dedication. Both his parents are working as coolie and together manage to earn Rs. 15000/- p.a.

- **Ajit Shivaji Bhandare**

Karnataka

Vishveshwara College Of Engg - E. C. E. (Placement)

He is also son to illiterate parents. His father is working as agriculturer earning Rs. 8000/- p.a. He secured 85.8 % in class XII. He will be joining HCL.

- **Chaithra Shree R**

Karnataka

Jyoti Niwas College - B. A. (FINISHED)

She secured 82% in her class XII. Her parents studied till middle school and father earns from bamboo basket making. Their total family income is Rs. 11000/- p.a.

- **Keerthana R**

Tamil Nadu

Srinivasn Engineering College - M. E.

Daughter of a day labourer earning only rs. 15000/- p.a. secured 93.7 % in class X and 86.5% in class XII.

- **Manjunatha G**

Karnataka

National Degree College - B. A. (FINISHED)

She is a first generation learner. Her father's occupation is agriculture and earns nearly Rs. 9000/- p.a. Her higher secondary score was 86.5%

- **Madhu Durgam**

Andhra Pradesh

J.N.T.U. College of Engineering - B. Tech. (FINISHED)

He is a son of illiterate parents. His mother earns Rs. 11000/- p.a. as agriculture labour. He secured 89.9% in class XII.

- **Rajpal Singh**
 Uttar Pradesh
 I.I.T. Roorkee - B. Tech. (FINISHED)
 Son to illiterate parents, got into IIT. His father is agriculturer with income of just Rs.27000/- p.a.
- **Vishram Kumar**
 Rajasthan
 I.I.T. Kanpur - B. Tech. (FINISHED)
 He is also a son of illiterate agriculturer. Their total family income is Rs. 24000/- p.a. Despite a score of 79.8 in higher secondary, he managed admission in IIT.
- **Chaitra.M.G**
 Karnataka
 J.S.S. Medical College - M. B. B. S. (FINISHED)
 Her higher secondary score was 85%. Her father is into bamboo business. Mother is a house wife and family income is approx. Rs. 12000/- p.a.
- **Malti**
 Uttar Pradesh
 Rajeev Academy For Pharmacy - B. Pharma (FINISHED)
 She is a first generation learner. Her father is a driver and manages to bring home Rs. 19200/- p.a. She secured 73% in class XII.
- **Madhu S K**
 Karnataka
 Jayachamarajendra College of Engineering - B. E. (FINISHED)
 She is a daughter of an auto driver. Their family income is Rs. 11000/- p.a. She scored 83% in class XII.
- **Veena P M**
 Karnataka
 Ghousia College of Engineering - B. E. (FINISHED)
 She borrowed money from her neighbours for her entrance tests. Her father is from defence and their family income is Rs. 10500/-. She got 80 % in class XII.
- **Bhawani Shankar Meena**
 Rajasthan
 National Institute of Technology - B. Tech. (Placement)
 He secured 92% in class X and 85% in his higher secondary. His father is an agriculturer and mother a housewife and family income is Rs. 20000/- p.a. He is now successfully working with Punj Lloyd Ltd. in Bangalore Metro Rail Corporation as an Engineer for construction.

- **C. Poonguzhali**

Tamil Nadu

College of Engineering - B. E. (FINISHED)

Her father has expired and mother is a stitcher earning Rs. 30000/- p.a. She secured 87% in her class XII.

- **H.G. Kalai Vani**

Tamil Nadu

V.E.L. Technology Engineering College - B. E. (FINISHED)

She is a daughter of a cobbler earning Rs. 24000/- p.a. She secured 83% in class X and 84% in class XII.

- **M. Navyasree**

Andhra Pradesh

Mamta Medical College - M. B. B. S.

She got 94% in class XII. Her father is an electrician earning Rs. 42000/- p.a.

- **Nalla Srikanth**

Andhra Pradesh

Gandhi Medical College - M. B. B. S.

This son of a daily labourer secured 92% in his higher secondary. His total family income is Rs. 21000/- p.a.

- **Rama Moorthy R.**

Tamil Nadu

Velammal College Of Engineering & Technology - B. E. (FINISHED)

He is a first generation learner who secured 85% in class X and 79% in class XII. His parents are agriculture labourers earning Rs. 24000/- p.a.

- **Ravi. K**

Karnataka

Sahyadri Science College - B. C. A. (FINISHED)

His father is a coolie earning Rs. 11000/- p.a. his class XII score was 82.4%

- **Arun Kumar**

Karnataka

M.V.J. Medical College & Research Hospital - M.B.B.S. (Finished)

His parents are illiterate and he scored 79% in his higher secondary. His father earns Rs. 9000/- p.a. as an agricultural labourer.

- **Chouta Balakrishna**

Andhra Pradesh

University Of Hyderabad - Integrated M. A (FINISHED)

He is a first generation learner. His father works as self agriculture coolie with an income of Rs. 15000/- p.a. He secured 72.5% in class XII.

- **Manu N.**

Karnataka

National Institute of Engineering - Information Science (FINISHED)

His father has expired and his family income is Rs. 11000/-. He secured 89% in class X and 90% in class XII.

- **Nandish H.R.**

Karnataka

Mandyai Institute of Medical Science - M. B. B. S. (FINISHED)

He is a first generation learner. His father is daily labourer earning Rs. 12000/- p.a. his class X score was 81% and 78% for higher secondary.

- **Ajimera Shekar**

Andhra Pradesh

University of Hyderabad - Integrated M. Sc (FINISHED)

He is a self generation learner. His mother earns Rs. 10000/- p.a. through daily wage. He secured 87% in his higher secondary.

- **K. Sudha**

Tamil Nadu

Jaya College Of Arts & Science - B. Com (FINISHED)

She is a daughter of coolie earning Rs. 62000/- p.a. She scored 82% in class X and 83.75% in class XII.

- **Lakshmikanth. C**

Karnataka

C.M.R.I.T. - B. E. (FINISHED)

His father is a daily labourer earning Rs. 16000/- p.a. He got 92% in class X and 77% in class XII.

- **Roshan Lal Regar**

Rajasthan

M.B.M Engineering College - B. E. (Placement)

He scored 87% in class X. His family income from agriculture is Rs. 24000/- p.a.

- **Srinivasa P.**
Karnataka
Govt. College of Nursing - B.Sc. Nursing (FINISHED)
His parents earn Rs. 10000/- p.a. from daily labour. He scored 76% in higher secondary.
- **Praveen H P**
Karnataka
Malnad College Of Engineering - B. E. (FINISHED)
He got 78% in his higher secondary. His father is a mechanic and is able to earn only Rs. 12000/- p.a.
- **Bhupender Kumar**
Rajasthan
Swami Vivekanand Institute Of Information & Technology - B. C. A. (FINISHED)
His father is into agriculture, mother house wife and their income is Rs. 20000/- p.a.. His higher secondary score was 75%.
- **Chandan Kumar Bharti**
Uttar Pradesh
Banaras Hindu University - B. Sc (FINISHED)
He is a first generation learner with a family income of Rs. 21600/- from agriculture. He got 74% in higher secondary.
- **I. Praveen Kumar**
Andhra Pradesh
C.M.R. Institute of Technology - B. Tech. (FINISHED)
He got 74% in his higher secondary and family income from agriculture is Rs. 12000/-
- **G. Bharath**
Tamil Nadu
V.E.L. Technology Engineering College - E. C. E. (FINISHED)
His father is a cook and earns Rs. 40000/- p.a. He got 78% in his higher secondary.
- **Ginminlen Touthang**
Delhi
St. Stephens - B. Sc. (FINISHED)
He got into Stephens with 78% in XII. His father is into agriculture earning approx. Rs. 35000/- p.a.
- **Navaneeth Kumar C**
Karnataka
Vishveshwara College of Engg - B. E. (FINISHED)
He is a son of coolie earning approx. Rs. 10000/- p.a. He got 84 % in his class X and 73% in class XII.

- **Vinod Kumar**

Uttar Pradesh

PDPM IITDM - B. Tech. (Placement)

Son of a agriculturer scored 83% in class X and 73% in clas XII. Their family income is Rs. 22000/- p.a. He will be joining Infosys.

- **Gugulothu Vijay Kumar**

Andhra Pradesh

National Institute of Technology - B. Tech. (FINISHED)

He got 90% in his higher secondary. His father is a government employee earning Rs. 145000/- p.a.

- **S. Selvavel**

Tamil Nadu

MBBS, Coimbatore Medical College

He is a first generation learner who completed his XII with 91.25%. His father is a farmer earning Rs. 18000/- p.a

- **Dhananjay Mondal**

Maharashtra

I.I.T. Bombay - M. Sc (FINISHED)

This first generation learner got into IIT . His family is able to earn a sum of Rs. 18000/- p.a.

- **Harshit B. Chaudhari**

Gujarat

Scheduled Tribe

M.B.B.S., B.J Medical College

He secured 75.8% in XII. His father is a primary teacher earning Rs.150000/- p.a.

- **Makwana Nileshkumar**

Gujarat

Scheduled Caste

M.B.B.S., Govt. medical College

He got 80% in his class XII. His parents have studied till senior school. His father is a worker earning Rs.24000/- p.a.

- **R. Mahesh**

Andhra Pradesh

Scheduled Caste

Computer Science & Engineering, Gpullareddy Eng. College (FINISHED)

He completed his XII with 87.1%. Both his parents are illiterate. His father and mother are working as coolie earning Rs.11000/- p.a.

- **Rathlavath Sreenivasulu**

Andhra Pradesh

Scheduled Tribe

Integrated M.A, University of Hyderabad

He is a first generation learner and completed his XII with 79.3%. His father has expired and mother is working as daily worker earning Rs.11000/- p.a.

- **S. Panimalar**

Tamil Nadu

Scheduled Caste

Integrated M.A, University of Hyderabad
